

Medical Business Q&A

Q: Why has NEC Display Solutions chosen to not develop future diagnostic displays?

In our most recent review of future diagnostic display products, we have decided to focus our product development and sales resources on our other core business segments including desktop, LFD, PJ, digital cinema and LED.

Q: How long will NEC continue selling current diagnostic display models?

We will continue selling existing inventory of diagnostic displays into the near future. A full list of MD series diagnostic display products that are affected is below. These details will be updated as information becomes available.

Q: Is NEC exiting the healthcare market?

This decision affects only diagnostic-grade desktop displays. NEC remains focused on providing solutions that exceed customer expectations for the healthcare industry.

Q: What is happening to NEC's clinical display business?

We will continue to offer mid-brightness clinical displays.

Q: Will NEC continue to support current and future customers using the existing diagnostic display products?

Yes, NEC will continue to support all products sold throughout their warranty period, including any updates to the GammaCompMD QA software. For North America, this is 5 years from the date of sale and includes Advanced Overnight Exchange Warranty.

Q: Will NEC still exhibit at RSNA?

The Radiological Society of North America (RSNA) will hold their annual meeting in November. We have traditionally exhibited at this event but due to its focus on diagnostic imaging and our decision to stop producing diagnostic displays, we will not participate in the 2016 RSNA exhibition.

Q: Is NEC exiting any other business segments?

No, NEC remains committed to providing new and innovative products for our core desktop, LFD, PJ, digital cinema and LED businesses. This change allows for additional focus on those segments.

Q: What if I have additional questions?

For product related questions, please contact Art Marshall (amarshall@necdisplay.com). For sales related questions, please contact Stan Swiderski (sswiderski@necdisplay.com).

Please visit <http://healthcare.necdisplay.com> for more information on NEC's complete catalog of healthcare solutions.

Diagnostic Display Products Affected	Estimated Last Shipment Date
MD210C2	When stock is depleted
MD211C2	When stock is depleted
MD210C3	When stock is depleted
MD211C3	Still generally available
MD212G3	When stock is depleted
MD302C6	When stock is depleted
MD211G5	When stock is depleted

*Dates will be updated as new information is available.

*Last updated 3/22/2017

All other MD series products are unaffected.
